

Shen MingYuan(June29th,2004)

Ming Yuan has a ready smile for everyone. He is now 10 years old. He likes to go outside during the warm weather and he is always ready to be taken for a ride in his wheelchair. He just soaks in attention. Although he requires assistance for all his care, he enjoys a variety of activities, including holding onto toys, especially ones that make noise. He is able to follow some directions, such as lifting his arm. He also likes being held and listening to music. He is much more comfortable since a volunteer nurse discovered that his severe eczema was being aggravated by a food allergy. Her weekly ministrations of TLC and topical medication has made him a very happy boy!

Shen YuanXing(Feb17th,2009)

Yuan Xing is 5 years old. He is a very sweet little boy. He is blind and is very "floppy" so he needs full support when he is moved from one position to another. He sighs with content when he is given a massage several times a week. Occasionally, he lets the massage therapist know he is uncomfortable by his change in facial expression. I think his favorite activity is getting a massage! Although he is not able to play with toys on his own, he allows staff and volunteers to open his hands so he can feel things.

Shen TongCHun(Mar1st,2009)

Tong chun- This young girl has been working on building strength and body control with hopes that in the future she would learn to stand and walk with assistance. She loves to hear songs and enjoys the colorful and noisy toys that are apart of the occupational therapy sessions she has received.

Shen YuanHai(Nov2nd,2002)

Yuan hai- Yuan Hai is an adolescent boy who is capable of walking and feeding himself and has some very basic communication skills. This young man could improve all of his motor skills in a setting where he could continue to practice and receive physical and occupational therapy.

Shen QingZheng(Nov.26th,2001)

QingZheng was born with cerebral palsy. When he came to us in March of 2006, he was somewhat of a “limp noodle” and couldn’t sit up by himself. He can sit up by himself now. He is very quiet, usually and seems to content to just be by himself. He “tracks” things that get his attention when we show it to him. He is using a gate trainer and is able to move to go around every day. He likes yogurt. Continued or even increased massage will keep helping his joints stay mobile and provide comfort.

Shen JunMei(Sep.23th,2003)

Every volunteer knows her. She used to cry when she saw a volunteer who doesn’t push her wheelchair. Is very stimulated by lots of noise and activity, gets excited easily and would benefit from brushing and compressions. She will shake, make noises(cries) and touch ears to feel herself; in order to know where her body ends and the world and outside noises begin.

Shen HuaJun

She is learning to read and increasing her vocabulary! This girl always has a smile ready and is brought to laughter after almost any comment, she loves to color and listen to music. HuaJun can understand Chinese and English and is improving all the time in her ability to speak more clearly and dialogue with those around her!

Shen JiaYu (Nov11th,2006)

Jia Yu is 7 years old. She always has a smile for those who take time to talk and play with her. She likes to be helped to play with toys such as a hand puppet, listen to and look at a picture books or activate toys that make noise. One of her favorites is a toy duck that chimes each time she moves it with her hand. Even when she cannot play with a toy herself, she likes to watch others make toys work. She loves to be held! She relaxes when given a massage. Because her physical skills are very limited by cerebral palsy, Jia Yu is dependent on adults to provide all her care. Although she is small for her age, she has grown much taller over the past year.

Shen JunTong(April11th,2006

Jun Tong has cerebral palsy and frequent seizures. She is 8 years old. Because she has grown so much over the past year, she has almost outgrown the special wheelchair she uses. She requires assistance in all areas of care. She is always happy to receive attention whether it is a massage from the massage therapist, or a visitor, volunteer or staff holding her or talking with her.

Shen TongFan(Sep,30,2007)

Tong Fan is 8 years old. She is able to sit in a wheelchair without extra support, but cannot walk or feed herself. She enjoys watching the activities around her, and, of course, really likes it when someone gives her their undivided attention. She enjoys being taken for a ride in her wheelchair, either down the hall to another room or outside when the weather is warm enough. Tong Fan is beginning to use the gait trainer to be in a standing position.
